

EDUCATION and HONORS

Ontario College Diploma in Mobile Application Design and Development Algonquin College Ottawa, Ontario, Canada	September 2023-June 2025
- Relevant Coursework: Hybrid Mobile App Development, User Experience/Interface Design. - Developed cross-platform mobile applications using .NET MAUI and object-oriented programming principles. - Implemented responsive user interfaces and accessed native device functionality across platforms.	
Bachelor of Science in Computer Science Carleton University Ottawa, Ontario, Canada	September 2020 – June 2023
- Relevant Coursework: Discrete Structures, Abstract Data types and Algorithms, Operating Systems. - Entrance Scholarship, International Award of Excellence.	

SKILLS: [Java](#) | [JavaScript](#) | [C/C#](#) | [.NET MAUI](#) | [Avalonia UI](#) | [Figma](#) | [React.js](#) | [Node.js](#) | [Git](#) | [Python](#) | [HTML](#) | [CSS](#) | [MySQL](#) | [Swift](#) | [Kotlin](#) | [Dart](#)

EXPERIENCE

UI/UX Designer Miricyl Remote	April 2024 – August 2024
- Designed and prototyped a mobile application; a gamified self-serve mental health treatment plan for young people (ages 16-25) - Conducted user-centered design research, including user interviews and usability testing, to understand the challenges of young people and their support networks. - Integrated key features such as streak tracking, avatar customization, and weekly challenges. - Led UX prototyping sprints, refining designs based on user feedback. - Collaborated with cross-functional teams and maintained clear communication with team members.	
Software Engineer Intern CompSciLib Wilmington, Delaware, USA	May 2022 – August 2022
Spent 4 months working on an internal tool that helps technical writers edit the company website easily.	
- Technical writers experienced a significant decrease in the time required for editing tasks. - Through meticulous mockups and UI components, we ensured a cohesive and uniform website design. - Continuous collaboration with the founder and technical writers led to over 20 iterative improvements, ensuring that the tool met the specific needs and requirements of the users. - Leveraging Next.js and Git resulted in a 30% increase in turnaround time for update deployments.	

PROJECTS

APOD Explorer Cross-Platform Application Tech Stack: C#, .NET MAUI, XAML	March 2025
- Designed and developed a multi-page cross-platform application with a tab-based navigation architecture using .NET MAUI and XAML. - Built an interactive image exploration interface integrating NASA’s APOD API with support for randomization, date filtering, slideshow presentation, and personalized birthday-based image retrieval. - Implemented gesture-driven UI interactions including swipe navigation, fullscreen image exploration, and quick-save functionality. - Developed reusable UI logic and state management for dynamic content rendering and slideshow timing controls. - Applied responsive UI and accessibility principles through semantic image descriptions, adaptive layouts, and persistent user settings. - Leveraged asynchronous API calls and local preference storage to improve application performance and user experience.	
Helprr School Project Tech Stack: Figma	September 2024
- Conceptualized and designed a mobile care coordination platform intended to improve access to in-home elderly support services. - Created accessible mobile interfaces prioritizing simplicity, readability, and low-friction interactions for elderly users and caregivers. - Developed interactive prototypes and user flows for scheduling, caregiver communication, and support-network management. - Applied user-centered design principles to address challenges related to trust, accessibility, and digital confidence among older adults. - Iterated on interface designs through usability-focused design thinking and accessibility considerations.	
Era Banking School Project Tech Stack: Figma	September 2023 – December 2023
- Designed and prototyped a mobile wallet interface in Figma as part of a 4-person cross-functional team, focusing on usability, visual consistency, and user flows - Created wireframes and prototypes to visualize and iterate on design concepts. - Ensured consistency in design elements, such as color schemes, typography, and branding, throughout the interactive mockup. - Implemented feedback from team members and stakeholders to enhance the overall user experience.
